

WADO SNOWBLOWERS for North America

Made **in** Japan

about **WADO**

 **JAPAN**
Since 1941

WADO is a manufacturer who provides consistent support from development to production and sales. Because of its high engineering capabilities, Japanese major brands entrust their production to WADO. By including them, WADO's production volume of snowblowers reaches 70% in Japan and the highest.

Achievements Outside Japan

European WADO SNOWBLOWERS dealer network
(as of April 2025)

The snowblowers that WADO has been contracted to produce by major brands have long been used in North America and Europe under their brand. Meanwhile, WADO has started exporting directly to Europe under WADO brand since 2018, and WADO SNOWBLOWERS are now loved by users in 7 countries in the Alps and Scandinavia.

Customer Review

After years of premium snowblower experience, my best on the market has now become a solid number two.

WADO is the number one. Speaking from experience and with a solid basis for comparison.

I switched from a similar-sized model from another Japanese manufacturer to the WADO SXC1070HE. After a weekend’s snow clearing at the cabin—where the terrace had a thick layer of ice underneath—it barely even noticed it.

It’s like walking behind a locomotive. It has excellent directional stability, even with ice at the bottom, which is a key difference from my last snowblower. That one would have moved around more, requiring more effort from the operator.

Smooth and controlled when changing direction—no surprises. You just walk behind it, relax, steer, and keep an eye on things.

In deep snow, the machine almost disappeared into the snow, yet it still had great forward momentum.

If you’re considering a machine, there’s nothing more to think about. If you want the best, this is the answer.

This thing is absolutely insane!

From Norway

DOUBLE
AUGERS

WADO has supported people living in areas with heavy snowfall and professional users for many years with the double spindle augers.

Power	Clearing Width	Throwing Distance
44.1 ps	46 in	98.4 ft

Features

3

1, Travel Clutch Safety Feature

It starts traveling only from the neutral position.

2, Backward Safety Bar

By pushing the bar in, it stops traveling for preventing accidents.

1, 4
5, 6

3, Chute Safety Cover

When removed the cover, the engine will stop to prevent accidents.

4, Travel Clutch on the Shift Lever

One hand operation of clutch and speed control.

7

5, Stepless Travel Speed Control

Easy control with hydrostatic transmission.

6, Dual Range Hydrostatic Transmission

Low range is suitable for tough work.

9

7, Easy Snow Removal Operation

Snow throwing direction and auger height are adjustable with levers.

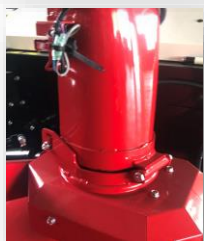

8,
1 0

8, Auger Horizontal Sensor

Always keeping the auger horizontal regardless of the chassis tilt.

1 1

9, Auto Auger Lift

While reversing, the auger housing automatically lifts up.

1 0, Auto Turn Chute

Turning the chute fully with one push.

1 2

1 1, Angle Adjustable Chute

Selectable distance or highly raising.

1 2, Hydraulic Power Cylinders

For auger height / tilting adjustment.

1 3

1 3, Maneuverability from Stuck

The crawler layout and optimized weight balance assure ease of maneuvering.

Machine Data

Length	Width	Maximum Height	Weight	Horse Power
