WADO

SINCE 1941

ABOUT WADO

WADO is Japan's premier snowblower manufacturer, providing end-to-end support from development through production and sales. With strong engineering capabilities, WADO is a leading brand in its own right and a trusted manufacturing partner to many of Japan's top brands. Including these partnerships, WADO accounts for approx. 70% of snowblower production in Japan.

INTERNATIONAL POWER

WADO-manufactured snowblowers have long supported major brands across Europe and, more recently, North America.

Alongside OEM production, WADO-branded units are widely sold. Since 2018, WADO has expanded direct exports to eight countries in Europe, followed by the USA in 2025.

CUSTOMER REVIEW

After years of premium snowblower experience, what was once my best-in-market has become the number two choice.

WADO now ranks number one, speaking from experience and with a solid basis for comparison.

I switched from a similar-sized model from another Japanese manufacturer to the WADO SXC1070HE. After a weekend's snow clearing at the cabin—where the terrace had a thick layer of ice underneath—it barely even noticed it.

It's like walking behind a locomotive. It has excellent directional stability, even with ice at the bottom, which is a key difference from my last snowblower which moved around more, requiring more effort from the operator.

The SXC1070HE is smooth and controlled when changing direction—no surprises. You just walk behind it, relax, steer, and keep an eye on things.

In deep snow, the machine almost disappeared into the snow, yet it still had great forward momentum. If you're considering a machine, there's nothing more to think about. If you want the best, WADO is the answer!

ADVANTAGES

Easy for Anyone

Simple controls make operation easy to learn and use

Enhanced Safety

Safety-focused design reduces risk of accidents

Expanded Work Area

Track-mounted drive reaches deep snow

Excels in Hard Snow

Removes hard-packed snow, including snow from roofs—where other brands fall short

Versatile Operating Range

Wide-clearing and powerful. Superior performance in open or confined spaces

High Return on Investment

Built for durability, delivering longer service life, lower operating costs, and stronger overall profitability

Legacy

Nearly 90 years of Japanese engineering behind exceptional long-term performance

Made in Japan
