Nimble. Easy. Commercial Grade. Made in Japan.

ABOUT WADO

WADO is Japan's premier snowblower manufacturer, providing end-to-end support from development through production and sales. With strong engineering capabilities, WADO is a leading brand in its own right and a trusted manufacturing partner to many of Japan's top brands. Including these partnerships, WADO accounts for approx. 70% of snowblower production in Japan.

WADO is now available in the United States. We are actively seeking distribution partners across North America.

INTERNATIONAL POWER

WADO-manufactured snowblowers have long supported major brands across Europe and, more recently, North America.

Alongside OEM production, WADO-branded units are widely sold. Since 2018, WADO has expanded direct exports to eight countries in Europe, followed by the USA in 2025.

CUSTOMER REVIEW

After years of premium snowblower experience, what was once my best-in-market has become the number two choice.

WADO now ranks number one, speaking from experience and with a solid basis for comparison.

I switched from a similar-sized model from another Japanese manufacturer to the WADO SXC1070HE. After a weekend's snow clearing at the cabin—where the terrace had a thick layer of ice underneath—it barely even noticed it.

It's like walking behind a locomotive. It has excellent directional stability, even with ice at the bottom, which is a key difference from my last snowblower which moved around more, requiring more effort from the operator. The SXC1070HE is smooth and controlled when changing direction—no surprises. You just walk behind it, relax, steer, and keep an eye on things.

Jan Olav Kihle
Norway

In deep snow, the machine almost disappeared into the snow, yet it still had great forward momentum. If you're considering a machine, there's nothing more to think about. If you want the best, WADO is the answer. This thing is absolutely insane!

DOUBLE AUGERS

Outstanding performance and a unique, purpose-built design enable new applications. Now available in North America.

SXG4546 COMMERCIAL GRADE

Photo shown is a Japanese model.
North American models include
auger side covers not shown here.

16.9 HP
42in Clearing Width
85ft Throwing Distance

WADO ADVANTAGES

Easy for Anyone

Simple controls make operation easy to learn and use

Enhanced Safety

Safety-focused design reduces risk of accidents

Expanded Work Area

Track-mounted drive reaches deep snow

Excels in Hard Snow

Removes hard-packed snow, including snow from roofs—where other brands fall short

Versatile Operating Range

Compact, wide-clearing, and powerful for both open and confined spaces

High Return on Investment

Built for durability, delivering longer service life, lower operating costs, and stronger overall profitability

Legacy

Nearly 90 years of Japanese engineering behind exceptional long-term performance

SPECIAL FEATURES

Travel Clutch Safety

Machine moves only from the neutral position

Travel Clutch on Shift Lever

One-hand control of clutch and speed

Smooth Variable Speed Control

Easy control with hydrostatic transmission

Dual-Range Hydrostatic Transmission

Low range for demanding conditions

Reverse Safety Bar

Stops travel when engaged to help prevent accidents

Easy Snow Removal Operation

Chute direction and auger height adjustable with levers

Chute Safety Cover

Engine stops when the cover is removed

Auto Auger Lift

Automatically lifts auger housing when reversing

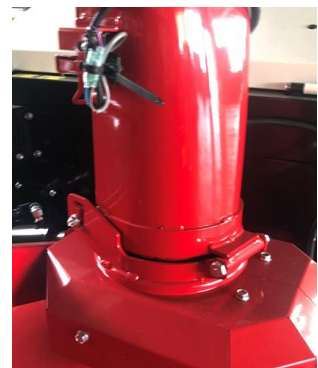

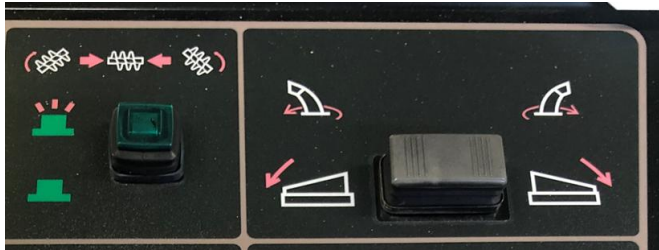

Auger Level Sensor

Maintains auger level regardless of chassis tilt

Auto Turn Chute

Full chute rotation at the push of a button

Angle-Adjustable Chute

Selectable throw distance and angle

Hydraulic Power Cylinders

Easily adjust auger height and tilt

Advanced Track System

Keeps you moving and gets you out when the snow fights back
